

INFORMATION FOR CONTRIBUTORS

Dinamika Teknologi is published tri-annually, in February, June and, October by Sekolah Tinggi Teknik Surabaya.

Dinamika Teknologi aims to:

1. Promote a comprehensive approach to technology incorporating viewpoints of different disciplines.
2. Strengthen academic exchange with other institutions
3. Encourage scientist, practicing engineers, and others to conduct research and other similar activities.

Dinamika Teknologi welcomes papers with the above aims and scopes. The editorial board decides papers to be published in Dinamika Teknologi after reviewed by reviewers appointed by the board. Authors will be advised of reviewers' comments and suggestions.

The guidelines below offer suggestions to authors and describe paper selection, review, revision, and publication processes. Adherence to these guidelines ensures expeditious handling of submitted material.

Submission and Correspondence

Author should submit paper in the form of A4 size hard copy. Papers and all correspondences should be addressed to:

Dinamika Teknologi Editors.
Pusat Penelitian - LPPM
Sekolah Tinggi Teknik Surabaya
Jl.Ngagel Jaya Tengah 73-77 Surabaya 60284
Tel. +62-31-5680920
Fax. +62-31-5041509
E-mail: Dinamika@stts.edu

Manuscripts should be typed double spaced (12-pitch font size) in a single column format on one side of letter size paper with 2.5 cm. wide margin (top, bottom, left, right). The length of a manuscript should be limited to less than 20 pages total (references, figures, tables, appendices. etc. inclusive). All pages should be numbered consecutively. Submission Deadlines:

April edition : first week of January
October edition : first week of July

Language

The language of the journal is English or Indonesian

Style

Manuscripts should be organized in the following order. Title; authors and affiliations; abstract and keywords: main body of paper, acknowledgment (where applicable); references; appendices (where applicable).

Abstract and keywords for manuscript written in Indonesian language should be written in Indonesian and English. Abstract and keywords for manuscript written in English can be written in English only. Each abstract should not exceed 150 words. The abstract should indicate the subject and scope of the paper and summarize the author's conclusion, so that it may become a useful document in an information-retrieval system. Three to ten keywords should be included.

Units

SI units must be used throughout the manuscript. If other units must be used, equivalent SI units should follow in parentheses. No rigid rules concerning notation or abbreviation need to be observed, but each manuscript should be self-contained as to symbols and units, which should be properly defined.

Figures and Tables

Photographs, charts, illustrations and diagrams are to be referred to as "Figures". All figures and tables should be placed within the text and identified with consecutive Arabic (not Roman) number in the order in which they are referred (separate numbers for tables and figures). All lettering, lines and symbols must be of uniform size drawn in black and white prints, and cropped to remove irrelevant information. It is better to use several simple tables than one large, complex table. All figures should be clear and suitable for reduction (up to 50% original size). Lettering must be clear and must be large enough to be reduced by the same proportion. All tables and figures must be accompanied by a self-explanatory caption.

Mathematical expressions

Mathematical symbols and formulae should be typed. Particular care should be exercised in identifying all symbols and in avoiding ambiguities. Distinction should be made between the number one (1) and the letter l, or i and between the number zero (0) and the letter o. Equations must be numbered consecutively. Equation numbers should appear in parentheses. All equation numbers must appear on the right-hand side of the equation and should be referred to within the text.

Program Listings

Program Listings should be typed single spaced (10-pitch font size) in Courier New font face with numbering. Example for Program Listings can be seen as follows:

```
1: Procedure Increment ( Var n : Integer );
2: Begin
3:     n:=n+1;
4: End
```

References

References to published literatures should be quoted in the text in numeric order. Numerical citation should be typed on the line, not as a superscript, and enclosed in square bracket, [1]. The references should be listed together at the end of the text in consecutive order, with enough information to allow readers to find the cited item.

Journal and Book references should be in the style set out as follows:

1. Han, J.H. and Chun Y.L., CORE: Correlation Force Ensemble Clustering, *Journal of the Information Technology*, EEEI, 102 (1), 1987, pp, 197-211.
2. Martin, S., Machine Learning, first edition, Prentice-Hall, New Jersey, 1997.

Review & Result

All papers will be reviewed, and the results will be informed to the authors within one month from the times of submission. The author should resend his/her soft copy of the accepted paper to dinatek@stts.edu as soon as the result has been informed.

Copyright and Originality

The author should include and sign a paper containing the following information

1. I declare that this paper ... (title of paper) ... is original and has not been published previously or under consideration to be published elsewhere.
2. With the publication, I transfer the copyright to Dinamika Teknologi. This copyright transfer shall cover the exclusive right to reproduce and distribute the article, including reprint, photographic reproduction of similar nature and translation. It shall also include the right to adapt the article for use in conjunction with computer system and programs including reproduction or publication in machine-readable form and incorporation in retrieval systems.

Author,
